

**Instructions on how to use the ArcGIS Explorer Tool on the cewc.colostate.edu site:**

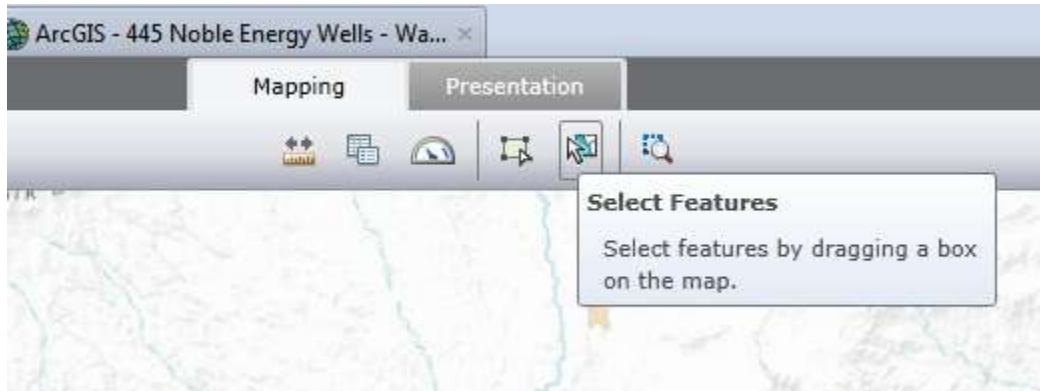

1. Once you click on the link to the Larger Map, select the “Open this map in ArcGIS Explorer Online” Link on the left side of the map, below the description. (As shown below)

2. Now this map opens in the Explorer page. You have a set of tools which you can use to compare and view various characteristics as shown on the dashboard to your left.

3. To use these tools more specifically and effectively, click on the “Select Features” button in your Mapping Tab.

4. Once you click on the “Select Features” button, you will be able to select more than one well to view their characteristics and compare with the other wells. You can drag the cursor and choose any area desired.
